ď

Applicants August 25, 2003 election (on/traverse) and amendment and remarks been considered.

Claims 34 to 58 are composition claims comprising (A) <u>doxycycline</u>, a tetracycline antibiotic, (claims 37, 38, 57, 58, (B) <u>citric acid</u>, an organic acid ) (claims 46, 57, 58), (said composition intended for removing smear layer).

Claims 57 and 58, the most comprehensive species claims presented, to (A) (B) (C) are constructively elected, claims 34 to 56 are generic to this constructively elected originally presented species.

Each of references (A) to (J) describes the constructively elected (A) (B) (C) species as a composition, (even if not for applicants' purpose) of these Akazawa et al and Chen et al are selected.

It is the policy of the USPTO to give no weight to a statement of intended use in the preamble of a composition claim, as presented herein.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.

4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 34 to 58 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Akazawa et al U.S. 3846548, and Chen et al U.S. 6383471, and anticipating and describing compositions encompassed percentages of each of (A) doxycycline, (B) citric acid, and (C) polysorbate 80.

It is the policy of the USPTO to give no weight to the intended use of an old composition. <u>In re Sinex</u>, 135 USPQ 302, 305 (CCPA-1962); <u>In re Zierden</u>, 162 USPQ 102, 106 (CCPA-1969) and <u>In re Pearson</u>, 181 USPQ 644 (CCPA-1974).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shep Rose whose telephone number is (703) 308-4609. The examiner can normally be reached on Monday, Tuesday, and Thursday 7:30am-6pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marianne Seidel can be reached on (703) 308-4725. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1235.
